PROJECTS

Project 1

NFT Ticketing – Web3 Platform for Minting and Trading *(Sep 2024 - Oct 2024)*

- Developed a comprehensive full-stack NFT Ticketing System, allowing users to mint, buy, sell, and trade event tickets securely as NFTs. Integrated Web3 wallet authentication for seamless user interactions, and utilized blockchain technology to ensure transparency, security, and tamper-proof transactions, providing a reliable solution for event organizers and attendees.

Project 2

Socio3 - Web3 Version of Reddit *(Jan 2025 - Mar 2025)*

- Developed a decentralized Web3 Reddit platform, utilizing smart contracts to manage user-generated content, including posts, upvotes, and downvotes. The platform ensures transparency and security by automating voting and reward distribution, creating a community-driven ecosystem where users are incentivized for their participation, while maintaining a tamper-proof and trustless environment.

ACHIEVEMENT

🏆 **Hackathon Achievements**
Participated in hackathons focused on blockchain technologies like Avalanche and Solana, demonstrating creativity, problem-solving skills, and the ability to build innovative solutions within tight deadlines.
